Fig. 1

Fig. 2

Choose a suitable place to mount the Safe:
When choosing the most suitable place the following is very important:

- Make sure that the car safe will not be visible from the outside of the vehicle.
- Make sure that it is within easy reach for yourself.
- Make sure that there is enough space to completely remove the safe from the holder without hindrance.

Note: the car safe will be secured with 6 screws and rubber pads (fig. 1). Make sure that the screws won't damage any electrical wiring, fuel pipes or other delicate materials. Consult your dealer when in doubt.

Remove the safe from the holder and use a screwdriver to mount the holder with the 6 screws and rubber pads. Make sure to fasten the screws completely (fig. 2). If not fastened completely, you may not be able to slip the safe into the holder.

After mounting the holder, check again to make sure that there is enough space to completely remove the safe from the holder without hindrance.
